

### 3 - 6 関東南部辺長変化

#### Change in Side Lengths in Southern Part of Kanto District

国土地理院測地部

Geodetic Division, Geographical  
Survey Institute

最近数年間の関東南部の辺長測量結果をまとめたのが第1図である。この結果によれば相模湾地域に特に大きな歪変化は起きていないようである。

第1図 関東南部辺長測量結果

Fig. 1 Change in side lengths in southern part of Kanto district. For example numerals +2/(46,48) indicate that observations were performed twice in 1971 and 73 and the distance extended by 2cm for the two years. (The numerical figures in the parentheses show the year of the present imperial reign. Christian Era is obtained by adding 1925 to them).
